

# Life after Sage 50 Accounts with Business Central Switch

## MAKE THE MOVE. SOLVE PROBLEMS.

If you've outgrown the functionality of Sage 50 Accounts and feel it's no longer serving your business - it could be time to switch ERP systems. And switching from Sage 50 Accounts doesn't have to be complicated - or costly!

With Business Central Switch, Xperience's streamlined implementation approach, you can get up and running with all the essentials of Dynamics 365 Business Central FAST, and you can bring across your data, transactional history, and your chart of accounts.

Simple. Scalable. Smart. That's how you start Business Central the right way.

## 5 Signs You've outgrown Sage 50 Accounts

- Poor reporting and lack of business insight
- System functionality issues
- An overuse and reliance on Excel
- Limited accounting feature functionality: (multiple-currency/company consolidation)
- Inability to integrate with other business systems

## Why choose Business Central?

Business Central is more than just ERP software - it's the foundation for smarter, more connected, and future-ready business! As Microsoft's leading ERP solution for the SMB sector, it works seamlessly with other Microsoft 365 productivity tools like Outlook, Excel & Teams - boosting collaboration and productivity from day one.

As a cloud-based solution - you can say goodbye to expensive hardware and constant upgrades. All whilst being accessible from anywhere (laptop, tablet, or smartphone). Stay connected and productive, no matter where you are.

**And for businesses on Sage 50 Accounts, Xperience's dedicated Switch programme ensures a seamless path to Business Central with minimal disruption.**

# As a Sage 50 user why should I choose the Switch program?

Many businesses stuck with Sage 50 Accounts simply don't have the time or the budget to make the transition they need to a modern ERP solution.

Using the Business Central Switch implementation model, you can transition to Business Central with zero disruption, bringing across your historical data including customer and supplier records, and opening balances alongside your full chart of accounts. This means no rekeying, no costly delays or data import time, and instant access to familiar financial structures and historical insights from day one.

**Business Central Switch: Built for Sage 50 users - Make the move. Solve Problems.**

## Problems Solved moving to Business Central Switch

### Month End Processes

Business Central transforms month-end from a manual, error prone chore into a streamlined automated process, giving finance teams fast close times, real-time insights and complete confidence in their numbers.

### Real-time Reporting

Delivering real-time reporting and insights, Business Central empowers teams to make faster, data-driven decisions with up-to-the-minute visibility across your business.

### Multi-Currency Conversions

Business Central simplifies global operations with robust, automated multi-currency support, eliminating manual updates and enabling accurate, real-time financial reporting across borders.

### Workflow Automation

Empower your teams with intelligent, automated workflows, eliminating manual approvals and boosting control, speed, and compliance right across your processes.

### Multi-Company Consolidation

Business Central delivers seamless multi-company consolidation, automating intercompany transactions and providing real-time, group level financial insights without the spreadsheets and manual intervention.

### Disconnected Systems & Processes

Business Central connects your entire business ecosystem, seamlessly integrating with Microsoft 365, Power Platform & hundreds of third-party apps to eliminate silos, boost productivity & enable smarter decision making.
