Veeam Backup Essentials

Powerful. Easy to use. Affordable.

You need to manage your IT environment with less resources and a shrinking budget. Yet, the requirement for a comprehensive backup solution only increases as the data you manage grows exponentially.

How much easier could your day-to-to day operations be if you had a data protection solution that you could count on, one that just works?

Veeam® Backup Essentials™ delivers powerful, easy-to-use and affordable backup, recovery, monitoring and reporting for virtual, physical and cloud workloads — all from a single platform.

Veeam Backup Essentials Powered by

Veeam Backup & Replication™, a powerful and reliable data protection solution for cloud, virtual and physical workloads.

Veeam ONE™, a monitoring and reporting tool for cloud, virtual and physical workloads that prevents the occurrence of potential problems.

Protect and monitor all your workloads

Virtual: VMware | Hyper-V | Nutanix AHV | Red Hat Virtualization

Cloud: AWS | Azure | Google | IBM

Physical: Windows | Linux | IBM AIX I Oracle Solaris | Mac | NAS

Applications: Microsoft | Oracle | SAP | Kubernetes

Data protection made easy

Reliable backup

Back up any workload and store backups anywhere on premises or in the cloud with built-in replication at no additional cost.

Data portability

Migrate or recover any workload to AWS, Microsoft Azure or Google Cloud Platform while keeping your backups safe from malicious attacks.

Fast recovery

Tons of recovery options, giving you the ability to recover just about anything — big or small — to anywhere lightning fast.

Built-in security

Ransomware-proof backups to easily and inexpensively isolate your data and protect against cyberthreats.

Award winning support

24.7 technical support with hot fixes and updates without waiting for product releases.

Storage flexibility

Create fast backups and replicas from snapshots by using hardware from almost any storage solution, without lock-in.

Xperience

veeAM

Powerful file protection

Protect all your files across your organization — from application items to NAS — and instantly recover exactly whatever you need when you need it.

24.7.365 monitoring and reporting

Always stay connected and informed with real-time visibility into your backup, physical and virtual environments.

Veeam Universal License (VUL)

Veeam enables true license portability for workloads, whether they are physical, virtual or in the cloud with VUL. This fully featured license enables customers to protect all their workloads with just one license.
