

# Managed Identity Threat Detection & Response (ITDR)

Old-school perimeter security is over.

Identity threats have become the new attack boundary and your organisation is only one individual, one credential, or one application away from hackers getting access to your environment. Managed ITDR provides 24/7 identity monitoring and response to safeguard businesses against identity-focused threats.

## Key Outcomes

### 24/7 Eyes on Your Identities

Get continuous, comprehensive visibility with expert eyes watching your identity attack surface.

### Protect, Detect, and Respond

Proactive detection and response to protect your business-critical assets.

### Block Unwanted Access

Prevent unauthorised access before it can compromise your business operations.

### Uncover Shadow Workflows

Proactively detect and neutralise hidden threats to protect your business from covert cyber attacks.

### Skip the Noise, Not the Threat

Focus your efforts on identity threats that have been verified and pose a real risk to your operations.

# Your Identity Deserves Round the Clock Defense.

Rest easy knowing your identities are guarded 24/7.

Our continuous, real-time monitoring keeps a watchful eye on your entire attack surface, scrutinising user activities and Entra event logs to catch suspicious behavior the moment it arises. Backed by a team of experts who live and breathe hacker tactics, we stay ahead of the curve to protect your environment from even the most sophisticated threats. With advanced detection that targets critical risks like account takeovers and business email compromise, we provide the vigilant defense your identity deserves.

## Threats Detected...

### Session Hijacking

Stop hijackers and intruders from exploiting your systems.

### Location-based Anomalies

Expose unusual login locations and ensure only authorised users have access to your data.

### Privilege Escalation

Block unauthorised access and keep control firmly in the right hands.

### Credential Theft

Keep cyber criminals out by locking down and monitoring your identity assets.

### Malicious Inbox & Forwarding Rules

Detect unusual activity, protect your inbox, and ensure your emails stay secure and private.
