

Managed Endpoint Detection and Response

Managed EDR brings together the tech and the experts to ensure the endpoint security does precisely what it should: stop attackers in their tracks.

Top-tier endpoint security shouldn't be a luxury only for the big players with deep pockets. When basic defenses aren't enough, Xperience's Managed EDR levels the playing field with a solution tailored for organisations like yours.

We blend cutting-edge tech with expert oversight, offering 24/7 monitoring by seasoned experts who find, stop, and evict hackers hiding in your environment.

Key Outcomes

Catch What Slips Through the Cracks

Attackers will always find a way in—but when they do, you'll be ready. Our technology surfaces potential threats, leaving hackers nowhere to hide.

Enjoy 24/7 Peace of Mind

Relax and enjoy your day off knowing your endpoints are covered. Our 24/7 SOC team has your back, ready to respond to threats around the clock.

Break Hackers, Not Your Bank

Protect your budget while protecting your endpoints. Our straightforward pricing keeps things predictable—no surprises.

Act Only On Validated Threats

No more wild goose chases. We filter out false positives with human validation. So when you get an alert, you can act fast and with confidence.

Fight Hackers

Don't just find hackers, beat them at their own game. Our expert threat hunters track down their every move, removing their footholds and kicking them out for good.

Xperience Delivers What You Need to Beat Hackers

Many EDR solutions hook you with big promises but hide key features behind confusing subscriptions that stretch your budget and leave you vulnerable.

At Xperience, we keep it simple—everything you need is included.

	Xperience	Other Managed Solutions
Test & Human Expertise	 Combines top-notch endpoint tech with our team of experts— handling everything from management to hunting. Hackers don't rest, but neither do we.	 Delivers endpoint tech but skimps on the human touch, leaning on automation to save bucks and boost profits—leaving you to staff in-house experts to fill the gaps.
24/7 Coverage	 Watches your back 24/7 with our global SOC staffed by expert threat hunters who use their sharp insights to slice through the noise and focus on the threats that matter.	 Charges hefty fees beyond their standard packages only to partially monitor your systems with subpar coverage, while disguising simple alert forwarding as “threat hunting.”
False positive reduction	 Quickly isolates hackers & proactively responds before they can disrupt your business, while supporting your team in eliminating their presence & ensuring they never return.	 Drowns you in a sea of alerts with little context, diverting focus from other priorities and, crucially, from the threats that truly demand attention.
Containment & Response	 Highlights the most pressing threats with strict quality assurance processes that filter out the noise, ensuring you only respond to validated threats.	 Gives hackers extra time to meet their objectives, placing the burden on your team to track down and stop threats that operate with extreme speed and precision.
Pricing & Packaging	 A single package providing maximum value for your investments & ensures you have everything you need when you need it most.	 Sells you low-value services packages and then slaps on pricey add-ons—only to have you realize what's missing when it's already too late.
